QuickStart incorporates a unique, micro-nutrient package to ensure plants get off to a QUICK START. This package includes iron, zinc and manganese, proven to be beneficial to root development and seedling establishment.

WaterGard is a unique polymer coating for grass seed that is completely biodegradable and long-lasting. WaterGard seed coating works by capturing, storing, and releasing available nutrients to the seed. As water comes in contact with its insoluble matrix, it expands and encapsulates the seed within a moisture-rich environment.

For a new “poa” species that promises improved drought and heat tolerance as well as better disease resistance in more humid environments, typical of the transition zone and south. Good color and superior sod strength. Its dark green color and excellent turf quality provides an ideal product for both professional and homeowner markets.

Approved varieties will perform well and have the attributes including color, drought resistance, disease resistance, and promotion of turfgrass varieties that continue to exhibit good turf quality and promote turfgrass varieties that continue to exhibit good turf quality and continue to exhibit good turf quality. They say competition brings out the best in us, so put our Mountain View Seeds to the test and see why we’re the #1 in the industry.

The Kentucky Bluegrass matrix, it expands and encapsulates the seed within a moisture-rich environment. QuickStart is a unique, micro-nutrient package to ensure plants get off to a QUICK START. This package includes iron, zinc and manganese, proven to be beneficial to root development and seedling establishment.

WaterGard is a unique polymer coating for grass seed that is completely biodegradable, non-toxic, odorless and pet-friendly. WaterGard seed coating works by capturing, storing, and releasing available nutrients to the seed. As water comes in contact with its insoluble matrix, it expands and encapsulates the seed within a moisture-rich environment.
Vigorous establishment and grow-in with season-long bright green color. Features dark green, fine leaf texture. Excellent persistence and wear tolerance. Shade tolerable. Improved disease resistance and drought tolerance.

**PARKER LS**

Highly resistant to gray leaf spot and gray mold. Excellent fit in tall fescue based blends. Excellent seed production under irrigation. Excellent grass quality with very fine leaf texture and excellent color. 

**STARR 98 LG D**

Excellent for early spring green-up. Able to withstand heat, gray leaf spot and pink snow mold. 

**STORM**

Excellent for fine fescue fairways. Dark green, dense and uniform in color. Excellent disease resistance and tolerance to gray leaf spot. 

**SUPREME**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**VALKYRIE LS**

Deep green color with excellent disease resistance and tolerance to gray leaf spot. Excellent medium fescue for overseeding. 

**VAPOR**

Dark green color with excellent disease resistance and tolerance to gray leaf spot. 

**VICTOR**

Dark green color with excellent disease resistance and tolerance to gray leaf spot. Excellent coarse fescue for overseeding. 

**VIXEN LS**

Excellent color and texture in both cool and warm climates. Excellent drought tolerance. 

**VOLTA**

Excellent for fine fescue fairways. Dark green, dense and uniform in color. Excellent disease resistance and tolerance to gray leaf spot. 

**VOLTO**

Excellent color and texture in both cool and warm climates. Excellent drought tolerance. 

**WEEDFIGHTER II**

Highly resistant to gray leaf spot and gray mold. Excellent fit in tall fescue based blends. Excellent seed production under irrigation. Excellent grass quality with very fine leaf texture and excellent color. 

**WHITE MINE**

Excellent for fine fescue fairways. Dark green, dense and uniform in color. Excellent disease resistance and tolerance to gray leaf spot. 

**WINDMILL**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**WOTAN**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**XEROBSERVE**

Excellent color and texture in both cool and warm climates. Excellent drought tolerance. 

**YACHT**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**YACHT II**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**ZEPHYR LS**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture.

Any variety with the A.G.E. logo next to it indicates that a variety has been approved by the Alliance for Low Input Turfgrass. 

**NATIONAL TURF TRIAL**

Excellent color and texture in both cool and warm climates. Excellent drought tolerance. 

**NEPTUNE**

Dark green color with excellent disease resistance and tolerance to gray leaf spot. Excellent coarse fescue for overseeding. 

**NIRVANA**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**NORMAN**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**NUTRIENT**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**OCEAN**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**OLIVIA**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**Olympian**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture. 

**Orogen**

Standing 5 to 6 feet. Excellent for coarse fescue fairways. Excellent color and texture.
