Fastball 3GL has excellent crown rust resistance allowing it to be used in northern climates.

2017 NTEP Trial Mean Crown Rust Rating

SEEDING AND OVERSEEDING Fastball 3GL readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs. per 1000 sq. ft. Periodic reseeding at 3-5 lbs. per 1000 sq. ft. maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs. per 1000 sq. ft. is suggested for golf course greens. And 7-10 lbs. per 1000 sq. ft. (300-450 lbs. per acre) for tees, fairways and roughs.

MAINTENANCE Fastball 3GL will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of 1/2" and above.
