- GOLF COURSE FAIRWAY, TEES AND ROUGHS
- SOD PRODUCTION
- ATHLETIC TURF
- PROFESSIONAL LANDSCAPE
- TRANSITION ZONE CLIMATES

SEEDLING VIGOR

HIGH	7.7
LEGEND	6.0
LOW	1.3
LSD	0.7

Legend exhibits very high seedling vigor. Ideal to out-compete weeds and for fast ground cover.

2011 NTEP Mean Seedling Vigor Rating

GENETIC COLOR

HIGH	7.8
LEGEND	7.3
LOW	5.0
LSD	0.4

Legend has excellent genetic color. It is very dark green making it ideal for golf course and sports turf use.

2011 NTEP Mean Color Rating

SEEDING For most applications, Legend should be sown at 2-4 lbs per 1000 sq. ft. or 100-175 lbs per acre. Consistent watering is very important until after the first cutting. Legend is ideal for renovating existing turf that has been damaged or thinned by disease or wear. Overseed at 1 1/2 to 2 1/2 lbs per 1000 sq. ft.

MAINTENANCE Legend is versatile, growing well in both full and partial shade, and under both high and low maintenance programs. Mow as necessary, removing no more than 1/3 of the leaf. Legend can be maintained at 1/2" height when adequate moisture and nutrients are available. At a minimum, fertilize annually with 2 to 3 lbs of nitrogen per 1000 sq. ft. in a balanced formulation. More intensive programs produce a denser, more attractive turf.
