TALL FESCUE

## SUPERSONIC

TALL FESCUE

### A FINE HIGH FLYING TALL FESCUE

- TOP NTEP PERFORMER
- IMPROVED DROUGHT TOLERANCE
- FAST ESTABLISHMENT
- FINE LEAF TEXTURE
- EARLY SPRING GREEN-UP
- EXCELLENT BROWN PATCH RESISTANCE

**Supersonic** is ranked at the top of the NTEP in all categories and is a proven performer in real world applications. With improved drought resistance, **Supersonic** has shown excellent performance in the Southeast region maintaining it's high turf-quality in this demanding environment. **Supersonic** has fine leaf texture and early spring green-up, along with excellent brown patch resistance. **Supersonic** exhibits high seedling vigor to establish quickly and out-compete weeds.

**NTEP DATA**

VARIETY	TURF QUALITY SCHED. A	BROWN PATCH RESISTANCE	SPRING GREENUP	LEAF TEXTURE	SEEDLING VIGOR*
<b>SUPERSONIC</b>	<b>6.5</b>	<b>7.5</b>	<b>5.4</b>	<b>6.3</b>	<b>6.8</b>

Supersonic has excellent turf quality whether you manage it under a high or low maintenance plan.

2015 Mean Turf Quality Ratings.

**SEEDING AND OVERSEEDING** Tall fescue prefers warmer soil for germination, typically 55°F to 58°F. In the Transition zone this means early spring and early fall. Further north, late spring and late summer is preferred. Supersonic should be sown at a rate of 6 to 9 lbs per 1000 sq ft (275 to 400 lbs per acre), lightly covered with soil and kept moist until after the first cutting. Maximum density is achieved by planting with a slicer/seeder or following aeration, and with the application of a starter fertilizer. First mowings are generally within three weeks, or when plants first reach 3 in. in height. Overseed existing tall fescue at a rate of 225 to 300 lbs per acre.

**MAINTENANCE** Supersonic natural dark color, density and pest resistance minimize the need for extensive maintenance. Generally 2 to 3 pounds of nitrogen as part of a balanced fertilizer applied annually is all that's required. Cutting heights should range between 2 to 3 inches. Under controlled conditions heights down to 1 inch can be satisfactorily maintained.
