

ZINGER
KENTUCKY BLUEGRASS

- FAST ESTABLISHING
- DISEASE RESISTANCE
- SUPERIOR TURF QUALITY
- UTILITY BLUEGRASS
- ECONOMICAL OPTION
- IMPROVED TRAFFIC TOLERANCE

MORE BANG FOR YOUR BUCK

Zinger is a utility Kentucky bluegrass that offers a solution to multiple turf needs. It's fine leaf texture and superior color allow it to blend well with other cool-season grasses. These traits combined with fast establishment to provide cover sooner and out-compete weeds make it an ideal choice for the professional landscaper.

Zinger is also a great option for athletic fields where budget constraints don't have to result in sacrifices in turf quality. In addition

Zinger has superior traffic tolerance and excellent summer performance exhibited through disease resistance and drought tolerance. With **Zinger** you get more than you expect!

- TRANSITION ZONE CLIMATES

SEEDLING VIGOR

HIGH	7.7
ZINGER	6.3
LOW	1.3
LSD	0.7

Zinger exhibits very high seedling vigor. Ideal to out-compete weeds and for fast ground cover.

2011 NTEP Mean Seedling Vigor Rating

GENETIC COLOR

HIGH	7.8
ZINGER	5.6
LOW	5.0
LSD	0.4

Zinger has good genetic color. It is medium green making it ideal for landscape use.

2011 NTEP Mean Color Rating

SEEDING For most applications, Zinger should be sown at 2-4 lbs per 1000 sq. ft. or 100-175 lbs per acre. Consistent watering is very important until after the first cutting. Legend is ideal for renovating existing turf that has been damaged or thinned by disease or wear. Overseed at 1 1/2 to 2 1/2 lbs per 1000 sq. ft.

MAINTENANCE Zinger is versatile, growing well in both full and partial shade, and under both high and low maintenance programs. Mow as necessary, removing no more than 1/3 of the leaf. Zinger can be maintained at 1/2" height when adequate moisture and nutrients are available. At a minimum, fertilize annually with 2 to 3 lbs of nitrogen per 1000 sq. ft. in a balanced formulation. More intensive programs produce a denser, more attractive turf.
