

COMPASS II

CHEWINGS FESCUE

COMPASS II

CHEWINGS FESCUE

BEAUTIFUL AND SUSTAINABLE

- EXCELLENT TURF QUALITY
- SUSTAINABLE VARIETY
- DISEASE RESISTANCE
- GOOD YEAR-ROUND COLOR
- WEAR AND DROUGHT TOLERANT
- GROWS IN SHADY AREAS

Compass II is unsurpassed in turf quality. Its dark green color and excellent turf density make it a very attractive chewing fescue.

Compass II performs well under drought conditions, making it an excellent choice for areas with reduced irrigation. **Compass II** shows excellent disease resistance as well, scoring high in Summer Patch and Red Thread trials. **Compass II** maintains its dark green color year round and performs well at fairway height. In addition, **Compass II** is wear and shade tolerant, making it an ideal choice for home lawns and parks.

NTEP DATA

VARIETY	SUMMER PATCH RESISTANCE	DROUGHT TOLERANCE	TURF QUALITY UNDER TRAFFIC	TURF QUALITY UNDER SHADE	TURF QUALITY FAIRWAY HEIGHT

2014 NTEP FINELEAF FESCUE TRIAL - 2016 PROGRESS REPORT MEAN DATA.

AREAS OF USE

- GOLF COURSE ROUGHS
- LAWNS AND PARKS
- SLOPES AND NO-MOW AREAS
- SHADY AREAS
- LOW-INPUT AREAS

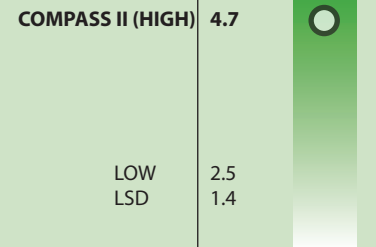

SUMMER DENSITY

Compass II has excellent summer density, showing how well it tolerates heat and drought stressors.

2016 NTEP Summer Density Ratings of Chewings Fescue Cultivars (Mean)

WINTER COLOR

Compass II has excellent winter color, making it a great choice for overseeding warm-season grasses.

2016 NTEP Winter Color Ratings of Chewings Fescue Cultivars (Mean)

SEEDING Broadcast Compass II seed at 4-5 lbs. per 1,000 sq. ft and whenever soil temperatures are above 60°F. Large areas for erosion control, slopes or open turf areas can be seeded at a rate of 160-200 lbs. per acre depending on the density desired.

MAINTENANCE Compass II performs over a wide range of environments, soil types and fertility levels. For best results, a minimum of 2-3 lbs. of nitrogen should be applied annually during the cool season. Recommended cutting heights range from 1/2 - 2 in. depending on level of maintenance and turf stand desired. On winter overseeded greens, Compass II can be mowed down to 1/8 in. alone or in combination with ryegrass and poa trivialis. Verticutting or de-thatching may prove helpful to speed breaking spring dormancy.
