

Fastball 4GL Perennial Ryegrass represents the next development in turf performance, combining cutting-edge genetics with outstanding visual appeal. A part of the newest generation perennial ryegrasses available, Fastball 4GL stood out in the NTEP trials, ranking among the top entries for overall turf quality. Its exceptional density, rich dark green color, and fine leaf texture make it a standout choice for turf professionals and homeowners alike. Whether you're managing high-traffic sports fields, pristine golf course fairways and tees, or beautiful residential lawns, Fastball 4GL delivers the performance and aesthetics you need. Its elite quality and versatility also make it ideal for use by municipalities seeking fast establishing, attractive green spaces. Bring on the heater with Fastball 4GL.

2023 NTEP Perennial Ryegrass Trial; Ratings 1-9; 9=Best.

SEEDING

Fastball 4GL readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs/1,000 sq ft. Periodic reseeding at 3-5 lbs/1,000 sq ft maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs/1,000 sq ft is suggested for golf course greens. And 7-10 lbs/1,000 sq ft (300-450 lbs/acre) for tees, fairways and roughs.
