

Harbor MR (PPG-FRR 132) is a brand-new addition to Mountain View Seeds' portfolio of Creeping Red Fescues. MR indicates Mesotrione Resistance. Unlike older varieties that show injury when Mesotrione is applied during establishment, Harbor MR performs very well with little to no plant injury. In the 2021 NTEP Fine Fescue trial, Harbor MR excelled in shade tolerance and drought tolerance, highlighting the diversity of this variety. Other strengths include strong spring green-up, stellar summer and fall density, and overall turf quality. Harbor MR is an excellent choice when a fine fescue is needed; take advantage of this top-rated Creeping Red Fescue and enhance your ability to withstand multiple seasonal stressors.

EXCELLENT SUMMER & FALL DENSITY

SUPERB DROUGHT & SHADE TOLERANCE

STRONG ESTABLISHMENT

FINE LEAF TEXTURE

AREAS OF USE

- Environmentally Sensitive
- Dry, Shaded Areas
- Bluegrass/Ryegrass Mixes
- Slopes, Parks, Reclamation
- Residential Turf

2021 NTEP TRIAL DATA

Variety	Overall Turf Quality ¹	Shade Turf Quality ²	Drought Tolerance	Establishment ³	Spring Greenup	Summer Density
Harbor MR	5.6	6.5	5.0	85.5 %	5.6	7.0
Bye	5.6	5.5	4.0	85.0%	4.7	6.9
Foxfire II	4.5	6.2	4.3	62.5%	5.0	6.3
Kevin	3.6	4.9	5.0	78.3%	5.3	6.8
Boreal	2.2	4.0	3.7	80.0%	4.6	5.5
LSD	0.8	3.0	1.6	30.1%	0.9	0.7

SEEDING

Broadcast Harbor MR at 4-5 lbs per 1,000 sq/ft for most applications. Erosion control and reclamation areas and ski slopes should be seeded at 150-200 lbs per acre depending on the turf density desired. Seed golf course roughs at 200 lbs per acre.

MAINTENANCE

Harbor MR quickly establishes over a broad range of growing and environmental conditions in most soils, particularly when initial irrigation is available. On sensitive areas and slopes, levels of maintenance can be minimal with no fertilization and one mowing per season. In other turf areas, whether used alone or in combination with other grasses, maintain stand at 2½" to 3" in height. A starter type fertilizer, applied at time of seeding, will greatly enhance establishment and "fill-in".
