

Homerun G-LS Perennial Ryegrass is a cutting-edge variety from the latest generation of turfgrass breeding, built for speed, strength, and superior turf quality. A top performer in the NTEP trials, Homerun G-LS has demonstrated exceptional results across a wide range of climates and regions, making it a reliable choice for turf managers nationwide. Its rapid establishment and strong disease resistance, combined with strong traffic tolerance and high density, makes it an ideal solution for high-demand turf situations. Perfect for sports fields, golf course fairways and tees, home lawns, and municipal landscapes, Homerun G-LS delivers a durable, lush playing surface with a fine leaf texture and excellent color. Whether you're looking for resilience under heavy use or rapid recovery after wear, Homerun G-LS knocks it out of the park—making it a true standout among modern perennial ryegrasses.

QUICK ESTABLISHMENT

FINE LEAF TEXTURE

SUPERIOR WEAR TOLERANCE

TOP RATED TURF QUALITY

AREAS OF USE

- Professional Sports Turf
- Tees & Fairways
- Sod Production
- Residential Lawns
- Warm-Season Overseeding

SEEDING

Home Run G-LS readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs/1,000 sq ft. Periodic reseeding at 3-5 lbs/1,000 sq ft maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs/1,000 sq ft is suggested for golf course greens. And 7-10 lbs/1,000 sq ft (300-450 lbs/acre) for tees, fairways and roughs.
