

Legend is an aggressive, Midnight-type, dark green Kentucky Bluegrass variety ideal for use in both high and low maintenance applications. Legend has very fine leaf texture and an aggressive nature making it an ideal choice for high-quality turf needs such as golf tees and superior athletic fields. Legend is also ideal for sod production and low-mow applications where the highest turf-quality is required. In addition Legend has improved disease resistance producing a clean, healthy turf. When only the best will do—rely on the Legend.

SEEDING

For most applications, Legend should be sown at 2-4 lbs per 1000 sq. ft. or 100-175 lbs per acre. Consistent watering is very important until after the first cutting. Legend is ideal for renovating existing turf that has been damaged or thinned by disease or wear. Overseed at 1½ to 2½ lbs per 1000 sq. ft.

MAINTENANCE

Legend is versatile, growing well in both full and partial shade, and under both high and low maintenance programs. Mow as necessary, removing no more than 1/3 of the leaf. Legend can be maintained at ½" height when adequate moisture and nutrients are available. At a minimum, fertilize annually with 2 to 3 lbs of nitrogen per 1000 sq. ft. in a balanced formulation. More intensive programs produce a denser, more attractive turf.
