

Valkyrie 2LS Tall Fescue is a premium turf-type tall fescue bred for exceptional turf quality, broad adaptability, and superior performance under both standard and intensive management programs. As a participant in the 2025 NTEP Turfgrass Evaluation Program, Valkyrie 2LS has consistently ranked among the top-performing entries. Its strong performance under fairway-height mowing adds to its versatility across a wide range of turf applications, while brown patch resistance and Lateral Spread™ Technology contribute to a dense, resilient stand with enhanced recovery potential. Valkyrie 2LS is an excellent choice for turf managers seeking consistent quality, durability, and performance under varying management conditions.

STRONG OVERALL TURF QUALITY

HIGH BROWN PATCH RESISTANCE

SUPURB FAIRWAY HEIGHT QUALITY

LATERAL SPREAD™ TECHNOLOGY

AREAS OF USE

- Professional Lawn and Landscape
- Residential Lawn
- Municipal Use
- Sports Fields

SEEDING

Tall Fescue prefers warmer soil for germination, typically 55°F to 58°F. In the Transition zone this means early spring and early fall. Further north, late spring and late summer is preferred. Valkyrie 2LS should be sown at a rate of 6-9 lbs per 1000 sq ft (275-400 lbs per acre). Maximum density is achieved by planting with a slicer/seeder or following aerification, and with the application of a starter fertilizer. Overseed existing tall fescue at a rate of 225-300 lbs per acre.

MAINTENANCE

Generally 2-3 lbs of nitrogen as part of a balanced fertilizer applied annually is all that's required. Cutting heights should range between 2-3". Under controlled conditions heights down to 1" can be maintained.
